

回收要乾淨 資源可循環

男旁白：回收？

回收？

回收？

骯髒的物品放進回收箱

會造成更多浪費

增加堆填區的壓力

我們應該做多一步

先喝光

或者把瓶子帶回家先清洗再回收

骯髒的物品就直接放進垃圾箱

這就做到乾淨回收了！

螢幕蓋字：回收要乾淨

資源可循環

Clean recycling for sustainability

MVO: Recycle?

Recycle?

Recycle?

Putting dirty recyclables into recycling bins

causes more wastage

and increases the pressure on landfills

We should take a step forward

Either finish the contents of bottles or containers

or bring them home to clean them before recycling

Put recyclables into trash bins

if they are dirty

All of us can do it for clean recycling
